

TCH Forecast Validator Installation Guide

1. Install MySQL.
2. Run database script the creates the database. You can run the script using this command:

```
mysql -uroot -p[password] < localhost.sql
```
3. Login to mysql command window and create a user account to access the table. Here is an example script:

```
CREATE USER forecastUser IDENTIFIED BY 'password';  
GRANT SELECT, INSERT, DELETE, UPDATE, LOCK TABLES, EXECUTE ON  
open_fv.* TO 'forecastUser'@'%';
```
4. Edit dbpool.properties file indicate the correct username and password.
5. Rename the fv.war to fv.zip, copy the dbpool.properties, open fv.zip and navigate to the /WEB-INF/classes folder and paste/replace the dbpool.properties file. Navigate back out of zip file and rename back to war.
6. Install Java SDK.
7. Install Tomcat 6 or higher.
8. Copy the war to the tomcat webapps directory.
9. Start Tomcat
10. Application should be available here: <http://localhost:8080/fv/fv>
